GitHub: <https://github.com/AnthonyChablov>

Resourceful Front-End Web Developer with in-depth knowledge of latest technology trends and frameworks like React.js to produce clean and responsive websites and web applications. Experience in handling complex HTML, JavaScript, CSS, React.js coding, design, and extensions to meet organization's Front-End Web Development needs. Detail-oriented collaboration with team members to define project requirements, expectations and demands. Hands-on testing and debugging to address inconsistencies and maintain performance thresholds.

Professional Experience

Freelance Web Developer

2022-09 - Current

Self-employed, Toronto, ON

- Planned website development, converting mockups into usable web presence with HTML, JavaScript, CSS, and JSON coding.
- Provided Front-End website development using React.js.
- Oversaw technical issues and troubleshooting requests to resolve user problems.
- Collaborated with client to establish project goals, projections, requirements, and milestones.
- Built and styled new websites and landing pages that are mobile-friendly and responsive.
- Generated web hosting presence to accommodate specified needs and increased web-traffic and user engagement by 100%.

Projects

Personal Portfolio Website: <https://www.anthonychablov.com/>

Developer & Designer

- Built responsive and interactive multi-page website using React-Router-Dom, React.js, React Hooks, HTML5, CSS3, SCSS, and React Toastify.
- Designed website and user-interface (UI) by creating a wireframe using Figma.
- Animated page transitions using Framer-Motion.
- Cut development time by 60% by creating reusable React.js Components, Custom Hooks, and JavaScript code.

Password Generator Application: <https://anthonychablov.github.io/password-generator-app/>

Developer

- Built responsive web application that generates a password based upon selected settings of password length and the inclusion of uppercase, lowercase, number, or symbol characters. Made using React.js, React Hooks, HTML5, CSS3, SCSS, React Toastify and MUI.
- Utilized Context API for state management to pass data and state through component tree.
- Decreased development time by 50% through reusable JavaScript code, React.js Hooks, and Components.

IP Address Tracker <https://anthonychablov.github.io/ip-address-tracker/>

Developer

- Built responsive web application that tracks an IP address and/or domain name and displays the location on a map. Made using React, React Hooks, CSS3, HTML5, SCSS, React Leaflet. Data was fetched using the Fetch API from The Geolocation DB API and The Map Tiler API.
- Reduced development time by 50% by creating reusable React.js Components and JavaScript code.

Education

Advanced Diploma: Computer Programming and Analysis

2021-09 - Current

Seneca College - Toronto, ON

Bachelors of Environment: Geography and Environmental Management

2015-09 - 2021-08

University of Waterloo - Waterloo, ON

Certifications

Modern JavaScript from The Beginning – Udemy Certificate

2022-07 – 2022-08

Learned fundamental JavaScript Web Development patterns, Document Object Model (DOM) manipulation, Asynchronous Programming techniques with Ajax, Fetch API, Callbacks, Promises & Async/Await, Error Handling with Try/Catch code blocks, using Regular Expressions and Client/Browser Web Storage using Local Storage, Session Storage and Cookies.
